

Quality Products. Service Excellence.

High Frequency Reactors 197 Series

Features:

- Perfect for high frequency filtering applications.
- High permeability core ideal for applications under 50 kHz
- High self-resonant frequency values
- Operating Frequency: 60Hz - 10kHz
- Some models feature universal channel mount packaging with flexible insulated leads (6" min.).
- Some models feature rugged construction with aluminum base and stainless steel band along with open-style terminals for maximum versatility.
- Consult datasheets for further design details.
- For applications at 60Hz, try out **195-196 Series**

Part No.	Inductance (mH)	DC Current (A)	Self-Resonant Frequency (kHz)	DC Resistance (mOhm)	Dimensions			Mounting Hole Pattern		Weight (lbs.)
