**1**

- Strip the cable with the cable stripping tool.
- Clean the cable

The diagram shows a cable with the outer jacket and a portion of the central conductor stripped away, as described in step 1.

**3**

- Introduce the cable into the body until center contact contact with the insulator.
- Place the sub-assembly on assembly jig
- Solder body on the cable.
- Let assembly cool down before removing it from the jig.

**2**

- Insert center contact until the cable
- Solder center contact
